

## Some Common Sounds

If you have normal hearing, you probably tend to overlook many sounds in your everyday living environment. You probably don't think about the hum of a computer, whirl of the ceiling fan, or the bang of something being dropped. Little hearing-impaired children need to learn about these many sounds that are part of the everyday world. This list of common sounds will give you ideas about what to point out to your child as you help him develop his listening skills.
