

Early Childhood Vision Screening Training

Ensuring Clear Vision for a Brighter Future ● ● ● ●

Vision screenings are part of a system of early detection. The intent of screening is to help identify if a child needs further evaluation by an eye care professional.

Why This Training Matters:

- **Early Detection**
Vision disorders can hinder development and learning. Early screening can transform a child's future.
- **Empowered Communities**
This training supports educators, healthcare professionals, and community organizations in promoting child health.
- **Evidence-Based Practices**
Developed in collaboration with leading vision health organizations.

What You'll Learn: Module Insights

- 1** Introduction to Vision Screening
- 2** Guidelines for Screening Preparation
- 3** Communication with Families
- 4** Recommended Tools for Young Children
- 5** Automatic Referrals
- 6** Follow-Up Procedures
- 7** Comprehensive Resources
